Assuming your data is in columns A to G with headers, and the student data starts from row 2, you can use the following formulas:

For the minimum marks (assuming the first student's data is in row 2):

1. Find the Minimum Marks and Maximum marks scored by each student.
Ans:=MIN(C2:H2)

2. Calculate the totals for each student, use conditional formatting to highlight the top students who have scored more than 480.
Ans:=MAX(C2:H2)

3. Calculate the length of the names of each student.
Ans:=LEN(B2)

4. Replace the Name Rakhi with Rocky. Use Formulas
Ans:=IF(FIND("Rakhi", B2), "Rocky", B2)

5. Combine the Roll Numbers and Names. Use formulas. The end result
should look like below.
100101Rohan
Ans:=A2&B2

6. As you can see that some names have
spacing issues. Use Formulas
to correct that spacing. Also ensure that the
names and surnames start
with a capital letter
Ans:=PROPER(TRIM(SUBSTITUTE(B2," "," ")))
